January 2012

## LAB SAMPLES FOR DECEMBER

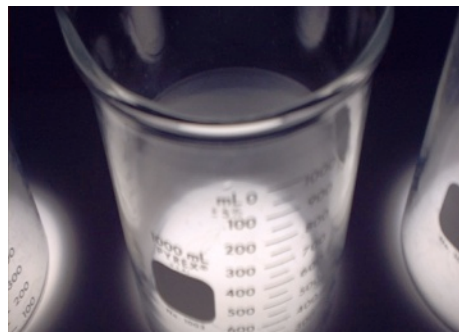

- 10 Bac-T samples
- 2 Fluoride samples
- 1 TOC sample
- TSS sample

December safety meeting: Housekeeping.

December M.O.R. mailed on January 3.

We now have an awning above the front door of the water plant. This simple cover will solve several problems we have had for years; this will keep us dry while getting in the building and keep snow from piling in front of the door. Hopefully, this will also keep the lock from freezing when we have a wintry mix of weather.

With the New Year comes annual sampling. Mostly these are samples that check for the presence of harmful chemicals including inorganics (mercury)

and volatile organics (carbon tetrachloride). Some of these chemicals are naturally occurring and some are man-made pollutants. They are checked yearly to see if additional treatment is needed for our water. So far we have not had to change our treatment because of any detected chemicals.
