

The Water Plant News

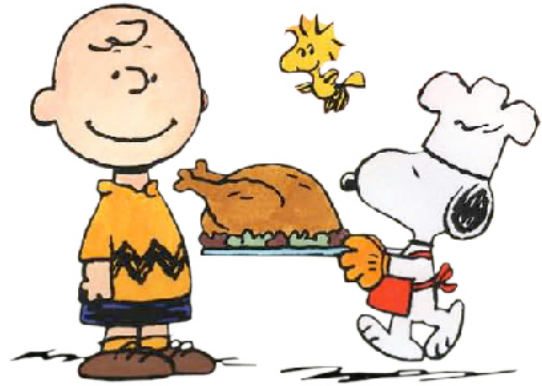

November 2011

LAB SAMPLES FOR OCTOBER

- 10 Bac-T samples
- 2 Fluoride samples
- 1 TOC sample
- TSS sample
- THM/HAA Samples

October safety meeting: Power Tools Safety

October M.O.R. mailed on November 1.

At left is a picture of some of the water plant crew. Johnnie Skipworth (far right) has been training at the water plant in the afternoons.

At left is a picture of our carbon feeder and bags of carbon. In October we stopped feeding carbon for the year. Carbon is fed during the warmer months to help with taste and odor issues that are the result of algae. In the colder months it is not normally needed, but is on hand for an emergency should any taste and odor issues occur.

Happy Thanksgiving!!!
